4+ yrs Business analysis
delivery

3 SDLC models (Agile,
Hybrid, Waterfall)

2 Enterprise environments
(banking + consulting)

3 Professional certifications

Summary

Business systems analyst with an engineering background and 4+ years supporting banking and consulting programs. Translate stakeholder needs into testable requirements, traceability, and KPI reporting that connects delivery health to business outcomes.

Education

Texas A&M University · College of Engineering · Electronic Systems (ESET) · Minor in Cybersecurity

Experience

2020 - Present · Banking + consulting delivery

2020 Banking foundations

Established requirements discipline and stakeholder alignment in regulated programs.

2022 Quality + compliance rigor

Expanded into process modeling, testing coordination, and audit-ready documentation.

2024 Consulting delivery

Tightened traceability, data quality, and operational reporting for consulting-led teams.

Booz Allen Hamilton · Regulated delivery + KPI reporting

BUSINESS SYSTEMS ANALYST

ROLE Translated stakeholder intent into functional and technical requirements while bridging product and data teams for KPI visibility.

ACTIONS Facilitated workshops, decomposed epics into stories with acceptance criteria, maintained RTM coverage, and built SQL-driven Power BI dashboards.

IMPACT Improved delivery transparency and decision readiness by standardizing requirements governance and consolidating KPI reporting.

Wells Fargo · IT delivery + process modeling

IT BUSINESS ANALYST

ROLE Supported banking product delivery by capturing requirements through JAD sessions and ensuring artifacts met BABOK and CMMI standards.

ACTIONS Developed process models and technical requirements documents, tracked defects, and collaborated with QA on test plans and backend validation using SQL.

IMPACT Strengthened audit readiness and reduced rework by tightening sign-off discipline and aligning requirements with test coverage.

Core Skills

METHODOLOGIES Agile, Hybrid, and Waterfall SDLCs; JAD facilitation, backlog refinement, and RTM governance.

REQUIREMENTS Functional and technical specs, user stories, acceptance criteria, and [traceability](#) management.

DATA + BI SQL for validation and analysis, data quality reviews, and [Power BI](#) KPI dashboards.

TOOLS Jira, Confluence, Postman, Swagger, Git, and [Linux \(NixOS\)](#) workflows.

COMPLIANCE HIPAA, GDP, CMMI; Lean Six Sigma Yellow Belt, [AWS Cloud Practitioner](#), and CompTIA Security+.
